Objective

The purpose of this document is to provide a consolidated view of all supported features and RFC compliance for Brocade FastIron platforms. For the supported features, the organization of the list matches the organization of the published guides. This document also lists the release in which each feature and RFC is introduced, with FastIron Release 8.0.01 serving as the release baseline. Setting the baseline to 8.0.01 means that features and RFCs listed as being introduced in release 8.0.01 are actually introduced in 8.0.01 or earlier.
